

Access to accounts and local payment channels

Vodeno's single API integration and direct scheme connectivity backed by business expertise and regulation cover all the functionalities to immediately establish a strong presence in Belgium, Germany, Sweden and Poland.

Settlement workflows

Facilitation of outgoing and incoming payments on behalf of the end-user.

Multiple schemes

Local schemes of non-EUR countries, including instant payments.

Single API

All payments under one universal connection.

Enabling entry to local markets

While entering the local markets your financial institution needs to consider multiple aspects.

Settlement workflows

What is relevant to my customers and what connections are required?

Legal structure

Should I open a branch or would license passporting be enough?

Tax or Legal

Are virtual accounts possible?

Settlement in local currency

What type of accounts should I get to settle efficiently? Do I need to become a direct member?

Relevant schemes

Which schemes do I need to support?
